

## INTENSIVE 32/10 COMPLETE MIX FOR JUVENILE CARP BREEDING

32/10 INTENSIVE is a part of the INTENSIVE line that has been used as a nutrient in pre-final fattening. It is also often used in the final fattening, depending on the amount of weight achieved at a given moment, which depends on a number of factors, such as the amount of nutrients in the water, the level of equipment.

The complete mix contains quality nutrients balanced in a ratio that exceeds expectations of this kind of production. Exceptional physical characteristics are not missing in any way, allowing the user to monitor the consumption of each meal and its correction.

Granulation		2,5 mm	3 mm	4 mm
Crude protein	%	32	32	32
