

RAS-CAGES 30/7 COMPLETE MIX FOR CARP FATTENING

RAS-CAGES is a food intended for production in recirculation and cage systems. The R-C RIBOKS line is the result of many years of development and research in the production of carp. The balanced meal is achieved according to the latest knowledge, both from the test center and from the production, and it always provides reliability, both in achieving the desired pieces of mass in relation to the density of individual fish, as well as in the economic part that always justifies the stake in such production. The impact of organic water load is also one of the very important advantages this line provides. The largest application is in a two-year cycle production.

Granulation		4 mm	6 mm	8 mm
Crude protein	%	30	30	30
Crude fats	%	7	7	7
Cellulose	%	5	5	5
Ash	%	8	8	8
Phosphorus	%	0,8	0,8	0,8
